## Light Age, Inc. signs a nationwide representation and distribution agreement with Moore Medical LLC, a subsidiary of McKesson Medical-Surgical, to sell the Q-Clear™ Compact Laser System.

Oct 23rd, 2013 – Light Age Inc., a Somerset, NJ based developer and manufacturer of advanced laser systems announces the signing of a nationwide representation and distribution agreement with Moore Medical LLC to sell the Q-Clear™ Compact Laser System.

This increases the distribution and offering of this product to US Physicians, Podiatrists, Dermatologists, and Plastic Surgeons. Together, they expect also to reach organizations supporting Corrections facilities, the Veterans Administration, Indian Health Services, and others.

Delivering both 1064nm and 532nm, the Q-Clear™ Laser System, has been FDA cleared since 2004 for more than two dozen indications. Providing revolutionary, minimally invasive and highly effective laser treatments. In 2011 was FDA cleared for treatment of patients with Onychomycosis (toenail fungus), it is also an effective solution for tattoo removal, as well as vascular and pigmented lesions. Weighing in at just 35 pounds, it is a portable and affordable solution for the practitioner.

The Q Clear™ Laser System is a breakthrough in the treatment of nail fungus. In many cases, relief is achieved in as little as one session. Estimates are that more than 10% of the US population suffers symptoms of this ailment.

Moore Medical LLC, a subsidiary of McKesson Medical-Surgical, is an Internet-enabled, multi-channel, specialty direct marketer and distributor of medical-surgical supplies, equipment and pharmaceuticals to approximately 120,000 healthcare practices, facilities and organizations in non-hospital settings nationwide. See [www.mooremedical.com](http://www.mooremedical.com)

“This is a great opportunity for both Light Age, Inc. and Moore Medical, LLC to provide our innovative Q-Clear™ to more practices nationwide, through the already established Moore Medical distribution network. That gives a great opportunity to more doctors to experience the best laser for treating Onychomycosis and other indications. As the clinical study submitted to the US FDA states: *Statistical analysis of results indicates significant apparent clearing in 95% of the subjects with an average clearance of affected areas of 56±7% at 98% level of confidence. The protocol employed was extremely well tolerated by patients, no pain was reported, although some patients reported feeling a low-level sensation on some involved toenails.*” Says George Georgitsis, Director of Marketing at Light Age, Inc.
